

Dylan Wiwad

Quantitative researcher with 10+ years of experience applying behavioral science, survey science, psychometrics, causal inference, and advanced analytics to guide product strategy and executive decision-making. Skilled in experiment and survey design, predictive modeling, and large-scale behavioral data analysis using R, Python, and SQL, with a proven record of driving measurable impact at Slack and through peer-reviewed research.

Professional Experience

Senior Quantitative Researcher July 2022 – Present
Slack | Salesforce

- **Built a company-scale product health measurement engine.** Led recurring surveys with 100K+ sampling frames; results became a consistent input into exec reviews up to Marc Benioff
- **Reshaped Slack’s AI roadmap through behavioral + survey science.** Ran end-to-end research on user needs and adoption barriers; insights influenced Channel Expert Agent development and helped elevate AI Customer 360 as a Salesforce priority
- **Drove product decisions at launch speed.** Partnered with PMs and Design to run rapid, scrappy-but-rigorous studies that directly shipped decisions (Slackbot/Channel Expert naming, Slackbot NUX, Channel Expert branding)
- **Self-served data daily and partnered tightly with DS.** Wrote SQL to pull samples, link survey + behavioral telemetry, and build tracking dashboards used for product launches and ongoing monitoring
- **Changed product architecture through usability diagnostics.** Led IA4 research that drove structural UX changes and improved positive:negative feedback from 1.6 → 5.4, exceeding OKR by 35%
- **Scaled quant research through automation.** Built SlackQR, an internal R package for sampling, weighting, analysis, and visualization; cut processing time from days to seconds

Independent Data Scientist + Developer June. 2025 – Present
[Hockey Decoded: Full stack sports analytics platform; Github Repo](#)
Tech: Python, FastAPI, AWS, Docker, Plotly

- **Created novel hockey analytics metrics (e.g., Total Depth Index).** Designed and validated latent-style measures of lineup depth; peer-reviewed manuscript in progress (available upon request)
- **Built a production-grade NHL analytics platform.** Engineered an automated ETL + live game pipeline (AWS S3, APScheduler) powering real-time dashboards across 82+ games/team/season
- **Deployed and scaled containerized infrastructure on AWS.** Shipped on ECS Fargate with CloudWatch monitoring; built interactive Plotly visualizations for rolling trends, rankings, and depth evolution across all 32 teams

Postdoctoral Fellow Sept. 2019 – July 2022
Northwestern University | Kellogg School of Management

- Designed and executed cutting-edge behavioral research on why people tolerate inequality and discrimination in organizations, from study conception to high-impact publication and international presentation.

Education

PhD, Social Psychology, Simon Fraser U.
MA, Social Psychology; Simon Fraser U.
BA, Psychology, Grant MacEwan U.

Skills & Competencies

Research Design + Methodology
Statistical Analysis + Modeling
Strategic Product Research
Data Viz + Communication
Academic Publishing

Tools + Methods

R | Python | SQL
SEM | MLM | Regression
Qualtrics
NLP | Text Analytics
VS Code | Jupyter | HTML + CSS

Interests

Chess | Cycling | Running | Web Development | Video Games
